

RTG4™ FCCC with Enhanced PLL Calibration Configurator Release Notes

Introduction

The RTG4FCCC with Enhanced PLL Calibration core generated circuit includes soft logic that performs calibration at power-up or when the PLL is reset. This ensures that the PLL lock is stable during normal operation within the supported RTG4 operating junction temperature range.

The RTG4FCCC with Enhanced PLL Calibration core does calibration on power-up and does recalibration whenever PLL loses lock. This core provides options to configure Single CCC, both the CCC together or in dynamic configuration.

1. Software Features and Enhancements

1.1 Option to Select Reset Type

A new option to select the reset type has been added to the RTG4FCCC with Enhanced PLL Calibration core configurator. The following are the available reset types:

- Synchronous with CLK_50MHZ
- Async Assert, Sync De-assert

The **Async Assert, Sync De-assert** option will have asynchronous assertion and de-assertion of reset synchronous to CLK_50MHZ. When selecting the **Async Assert, Sync De-assert** reset type, it is recommended to use a SET mitigated approach when connecting an asynchronous reset signal to the PLL_RST_N input of this core.

For example, an external reset can enter the device using a CLKBUF macro on a GB# pin, or a RGRESET macro can be manually instantiated and connected to a triplicated internal logic core. For more information, refer to [AC463: RTG4 Radiation Mitigated Clock and Reset Network Usage Application Note](#).

1.2 Dynamic Configuration Option

CLK_50MHZ clock will be used for both the PLL Calibration soft IP and the user dynamic configuration APB interface. The user logic generating APB signals during normal operation must synchronize the APB signals to CLK_50MHZ.

2. Migrating Designs to Libero SoC

2.1 Core Enhancements and Upgrades

The following table lists the RTG4FCCC with Enhanced PLL Calibration Core enhancements and upgrades.

Table 2-1. Core Enhancements and Upgrades

Core	Version	Changes
RTG4 FCCC with Enhanced PLL Calibration	2.1.010	New Core
RTG4FCCCECALIB	2.2.005	For more information, see CN19009C .

2.2 Updating the Core Version

On opening the designs having RTG4FCCCECALIB core with core versions older than 2.2.005, the corresponding designs will become invalidated. You are suggested to upgrade the version of RTG4FCCCECALIB core to the latest available core.

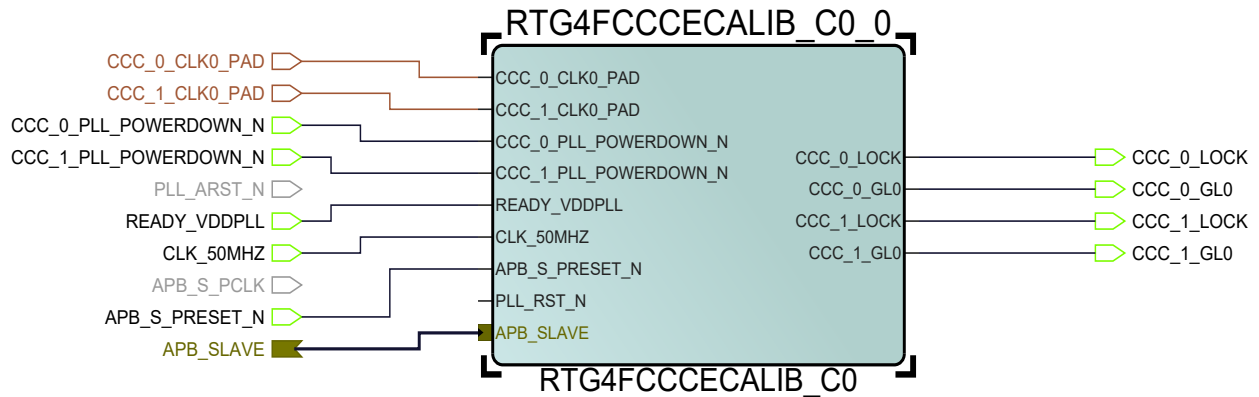

To update a core version:

1. Download the latest version of the core into your vault.
2. Upgrade each configured core in your design to the latest version by right-clicking on the core component in the design hierarchy and selecting **Replace Component Version**.
3. Regenerate the core.
4. Derive the timing constraints again using the **Constraint Manager** tool to use the latest generated core timing constraints.
5. Rerun the design flow.

On replacing the core version from previous release core versions, the following changes are visible in the core:

- External port `PLL_ARST_N` becomes unconnected.
- If dynamic configuration is used in the design, port `APB_S_PCLK` becomes unconnected.

Figure 2-1. RTG4FCCCECALIB core

3. Known Issues and Limitations

There are no known issues.

4. Revision History

Revision	Date	Description
A	08/2021	Initial Revision

5. Microchip FPGA Technical Support

Microchip FPGA Products Group backs its products with various support services, including Customer Service, Customer Technical Support Center, a website, and worldwide sales offices. This section provides information about contacting Microchip FPGA Products Group and using these support services.

5.1 Customer Service

Contact Customer Service for non-technical product support, such as product pricing, product upgrades, update information, order status, and authorization.

- From North America, call **800.262.1060**
- From the rest of the world, call **650.318.4460**
- Fax, from anywhere in the world, **650.318.8044**

5.2 Customer Technical Support

Microchip FPGA Products Group staffs its Customer Technical Support Center with highly skilled engineers who can help answer your hardware, software, and design questions about Microchip FPGA Products. The Customer Technical Support Center spends a great deal of time creating application notes, answers to common design cycle questions, documentation of known issues, and various FAQs. So, before you contact us, please visit our online resources. It is very likely we have already answered your questions.

You can communicate your technical questions through our Web portal and receive answers back by email, fax, or phone. Also, if you have design problems, you can upload your design files to receive assistance. We constantly monitor the cases created from the web portal throughout the day. When sending your request to us, please be sure to include your full name, company name, and your contact information for efficient processing of your request.

Technical support can be reached at soc.microsemi.com/Portal/Default.aspx.

For technical support on RH and RT FPGAs that are regulated by International Traffic in Arms Regulations (ITAR), log in at soc.microsemi.com/portal/DPortal.aspx, go to the **My Cases** tab, and select **Yes** in the ITAR drop-down list when creating a new case. For a complete list of ITAR-regulated Microchip FPGAs, visit the ITAR web page.

You can track technical cases online by going to [My Cases](#).

5.3 Website

You can browse a variety of technical and non-technical information on the Microchip FPGA Products Group [home page](#), at www.microsemi.com/soc.

5.4 Outside the U.S.

Customers needing assistance outside the US time zones can either contact technical support at (<https://soc.microsemi.com/Portal/Default.aspx>) or contact a local sales office.

Visit [About Us](#) for [sales office listings](#) and [corporate contacts](#).

The Microchip Website

Microchip provides online support via our website at www.microchip.com/. This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

Product Change Notification Service

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to www.microchip.com/pcn and follow the registration instructions.

Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: www.microchip.com/support

Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods being used in attempts to breach the code protection features of the Microchip devices. We believe that these methods require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Attempts to breach these code protection features, most likely, cannot be accomplished without violating Microchip's intellectual property rights.
- Microchip is willing to work with any customer who is concerned about the integrity of its code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable." Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Legal Notice

Information contained in this publication is provided for the sole purpose of designing with and using Microchip products. Information regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications.

THIS INFORMATION IS PROVIDED BY MICROCHIP "AS IS".
